1. The first part of the paper
discusses the general principles
of the theory of the
relativity of simultaneity.
It is shown that the
time interval between two
events is not the same for
all observers, but depends
on the relative velocity of
the observer and the events.

2. The second part of the paper
discusses the consequences of
the theory of the relativity of
simultaneity. It is shown
that the length of an object
is not the same for all
observers, but depends on
the relative velocity of the
observer and the object.
It is also shown that the
time interval between two
events is not the same for
all observers, but depends
on the relative velocity of
the observer and the events.
